

than one who possessed or distributed listed chemicals knowing or believing that they would be used to manufacture a controlled substance unlawfully.

4. **Application of Subsection (b)(3).**—Subsection (b)(3) applies if the conduct for which the defendant is accountable under §1B1.3 (Relevant Conduct) involved any discharge, emission, release, transportation, treatment, storage, or disposal violation covered by the Resource Conservation and Recovery Act, 42 U.S.C. § 6928(d), the Federal Water Pollution Control Act, 33 U.S.C. § 1319(c), the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. § 9603(b), and 49 U.S.C. § 5124 (relating to violations of laws and regulations enforced by the Department of Transportation with respect to the transportation of hazardous material). Any costs of environmental cleanup and harm to persons or property should be considered by the court in determining the amount of restitution under §5E1.1 (Restitution) and in fashioning appropriate conditions of supervision under §§5B1.3 (Conditions of Probation) and 5D1.3 (Conditions of Supervised Release).
5. **Application of Subsection (b)(4).**—For purposes of subsection (b)(4), “*mass-marketing by means of an interactive computer service*” means the solicitation, by means of an interactive computer service, of a large number of persons to induce those persons to purchase a controlled substance. For example, subsection (b)(4) would apply to a defendant who operated a web site to promote the sale of Gamma-butyrolactone (GBL) but would not apply to coconspirators who use an interactive computer service only to communicate with one another in furtherance of the offense. “*Interactive computer service*”, for purposes of subsection (b)(4) and this note, has the meaning given that term in section 230(e)(2) of the Communications Act of 1934 (47 U.S.C. § 230(f)(2)).
6. **Imposition of Consecutive Sentence for 21 U.S.C. § 865.**—Section 865 of title 21, United States Code, requires the imposition of a mandatory consecutive term of imprisonment of not more than 15 years. In order to comply with the relevant statute, the court should determine the appropriate “total punishment” and, on the judgment form, divide the sentence between the sentence attributable to the underlying drug offense and the sentence attributable to 21 U.S.C. § 865, specifying the number of months to be served consecutively for the conviction under 21 U.S.C. § 865. For example, if the applicable adjusted guideline range is 151–188 months and the court determines a “total punishment” of 151 months is appropriate, a sentence of 130 months for the underlying offense plus 21 months for the conduct covered by 21 U.S.C. § 865 would achieve the “total punishment” in a manner that satisfies the statutory requirement of a consecutive sentence.
7. **Applicability of Subsection (b)(6).**—The applicability of subsection (b)(6) shall be determined without regard to the offense of conviction. If subsection (b)(6) applies, §5C1.2(b) does not apply. See §5C1.2(b)(2) (requiring an applicable guideline range of not less than 24 to 30 months of imprisonment if the “statutorily required minimum sentence is at least five years”).
8. **Application of Subsection (c)(1).**—“*Offense involved unlawfully manufacturing a controlled substance or attempting to manufacture a controlled substance unlawfully*,” as used in subsection (c)(1), means that the defendant, or a person for whose conduct the defendant is accountable under §1B1.3 (Relevant Conduct), completed the actions sufficient to constitute the offense of unlawfully manufacturing a controlled substance or attempting to manufacture a controlled substance unlawfully.
9. **Offenses Involving Immediate Precursors or Other Controlled Substances Covered Under §2D1.1.**—In certain cases, the defendant will be convicted of an offense involving a listed chemical covered under this guideline, and a related offense involving an immediate precursor or other controlled substance covered under §2D1.1 (Unlawfully Manufacturing, Importing, Exporting, or Trafficking). For example, P2P (an immediate precursor) and methylamine (a listed
