

## **§2D1.1**

equal to 100 grams is premised on the fact that the average yield from a mature marihuana plant equals 100 grams of marihuana. In controlled substance offenses, an attempt is assigned the same offense level as the object of the attempt. Consequently, the Commission adopted the policy that each plant is to be treated as the equivalent of an attempt to produce 100 grams of marihuana, except where the actual weight of the usable marihuana is greater.

Because the weights of LSD carrier media vary widely and typically far exceed the weight of the controlled substance itself, the Commission has determined that basing offense levels on the entire weight of the LSD and carrier medium would produce unwarranted disparity among offenses involving the same quantity of actual LSD (but different carrier weights), as well as sentences disproportionate to those for other, more dangerous controlled substances, such as PCP. Consequently, in cases involving LSD contained in a carrier medium, the Commission has established a weight per dose of 0.4 milligram for purposes of determining the base offense level.

The dosage weight of LSD selected exceeds the Drug Enforcement Administration's standard dosage unit for LSD of 0.05 milligram (*i.e.*, the quantity of actual LSD per dose) in order to assign some weight to the carrier medium. Because LSD typically is marketed and consumed orally on a carrier medium, the inclusion of some weight attributable to the carrier medium recognizes (A) that offense levels for most other controlled substances are based upon the weight of the mixture containing the controlled substance without regard to purity, and (B) the decision in *Chapman v. United States*, 500 U.S. 453 (1991) (holding that the term "mixture or substance" in 21 U.S.C. § 841(b)(1) includes the carrier medium in which LSD is absorbed). At the same time, the weight per dose selected is less than the weight per dose that would equate the offense level for LSD on a carrier medium with that for the same number of doses of PCP, a controlled substance that comparative assessments indicate is more likely to induce violent acts and ancillary crime than is LSD. (Treating LSD on a carrier medium as weighing 0.5 milligram per dose would produce offense levels equivalent to those for PCP.) Thus, the approach decided upon by the Commission will harmonize offense levels for LSD offenses with those for other controlled substances and avoid an undue influence of varied carrier weight on the applicable offense level. Nonetheless, this approach does not override the applicability of "mixture or substance" for the purpose of applying any mandatory minimum sentence (*see Chapman*; §5G1.1(b)).

Frequently, a term of supervised release to follow imprisonment is required by statute for offenses covered by this guideline. Guidelines for the imposition, duration, and conditions of supervised release are set forth in Chapter Five, Part D (Supervised Release).

The last sentence of subsection (a)(5) implements the directive to the Commission in section 7(1) of Public Law 111–220.

Subsection (b)(2) implements the directive to the Commission in section 5 of Public Law 111–220.

Subsection (b)(3) is derived from section 6453 of Public Law 100–690.

Subsection (b)(11) implements the directive to the Commission in section 6(1) of Public Law 111–220.

Subsection (b)(12) implements the directive to the Commission in section 6(2) of Public Law 111–220.

Subsection (b)(14)(A) implements the instruction to the Commission in section 303 of Public Law 104–237.

Subsections (b)(14)(C)(ii) and (D) implement, in a broader form, the instruction to the Commission in section 102 of Public Law 106–310.

Subsection (b)(16) implements the directive to the Commission in section 6(3) of Public Law 111–220.
